

for a greener tomorrow

## PUSHING THE BOUNDARIES OF MODULAR PLC TECHNOLOGY.

### HUMAN-MACHINE INTERFACES

Mobile phones have revolutionized the way we interact with digital displays. The tactile input using simple touch gestures is easy to use and efficient. Our new generation HMIs give exactly the same comfort and feeling of your cell phone by virtue of easy operations like multi-touch and gesture operations. The experience is further enhanced by fast memory and increased memory size, which can be useful for screen gesture, trend graph and document display. Life sure is easy with the new range of HMIs from Mitsubishi Electric.
